

September 2015

NADA continues to be involved in the NGO grant reviews at both the state and commonwealth level. Sector Watch aims to keep members informed through regular updates for you, your staff, board and management committee.

NSW Ministry of Health

NADA meets regularly with the Ministry on Partnerships for Health. Our message has been consistent, that the sector requires ongoing communication about the process, an implementation and transition plan, and the development of a purchasing plan that outlines the specifications for services to be purchased. We are currently urging the Ministry to make a decision about further extending the grants while the above work is done.

Commonwealth Department of Health

NADA also meets with the Department of Health regularly, however we have not received any advice to provide the sector on future funding. We have recently written to the Department to seek an update on the outcome of the national review, any potential impact on the National Ice Taskforce in terms of funding to the treatment sector, and intentions for the funding of NGOTGP and SMSDGF grant recipients post 30 June 2016.

Do you have any questions you would like to know about the state and commonwealth funding developments?

Please send any questions you have to NADA and we'll forward them to government, and feedback to members through our Sector Watch updates.
