

OUT AND ABOUT?

***COVID IS ROLLING THROUGH THE DRUG USER COMMUNITY
BUT YOU CAN REDUCE YOUR RISK!***

- Only go out when you have to.
- If going out, plan and prepare for max safety.
- Your best protection is vaccination – it’s free.
- The best vax is the one you can get the quickest.
- Mix with as few people as you can.
- Keep your distance – 1.5 m away from others.
- Talk to your dealer about “no contact” – just like other delivery services.
- Dealing yourself? Run it like any other business – insist on masks, distance and no contact.
- Use masks, (sun)glasses, disposable gloves, sanitizer, wipes.
- Getting in a car? Go back seat.
- Stock up with injecting equipment by NUAA mail order delivered to your door - order at www.nuaa.org.au
- Remember COVID can pass by smokes, joints, pipes and straws, so go solo.
- Wipe down deals as well as equipment and surfaces.
- Use at home and mix up yourself.
